

SAUCEDEMO MANUAL TESTING - TEST PLAN

1. Introduction

This document defines the test plan for testing the SauceDemo web application. The purpose of testing is to verify that the major functionalities of the application work as expected and to identify defects before release.

The testing will focus on functional behavior, UI behavior, positive and negative scenarios, and the complete user journey from login to order completion.

2. Objectives

The objectives of testing are:-

- Verify that users can login successfully with valid credentials.
- Verify that products are displayed correctly.
- Verify that users can add and remove items in the cart successfully.
- Verify checkout functionality .
- Verify order completion.

3. Scopes

3.1 In scopes

Module	Test Coverage
Register	User information, Valid/Invalid , Empty fields, Duplicate accounts
Login	Valid/Invalid, Empty fields, Alignments, Locked Users
Product	Product listings, Add to cart, Visibility,Alignments,Labeling,Images Product Information
Sorting	Price (Low-High) and Name Sorting (A-Z)
Cart	Empty cart, Add to cart, Product Information
Wishlist	Add/Remove products, Wishlist state
Checkout	Customer Information, Product Information , Address, Order Validation

Order Completion	Notification, Confirmation message
Responsive/UI	Desktop, Tablet and mobile screen sizes, Alignments, Images, Text, Buttons.

3.2 Out of Scope

The following areas are out of scope from this project:-

- Performance testing
- Load testing
- Backend/API testing
- Stress testing
- Mobile application testing

4. Testing Approach

Manual testing will be implemented using following approaches:

- **Functional Testing:-**
Verify that each feature behaves as its expected functionality.
- **Positive Testing:-**
Verify that the system works correctly using valid credentials.
- **Negative Testing:-**
Verify that the system handles invalid inputs appropriately.
- **UI Testing:-**
Verify the visibility, labeling, alignments, images and buttons.
- **Responsive Testing:-**
Verify that the application displays correctly in different screen sizes.
- **End to End Testing:-**
Verify the complete user flow.

Flow 1 Registration:-

Sign up - Enter user details - Verify - Submit registration details - Login

Flow 2 Shopping:-

Login - Search Products - Add to Cart - Check Out - Order Completion

Flow 3 Wishlist:-

Login - Add to Wishlist - Verify Wishlist

5. Test Environment

Item	Details
Application	SauceDemo
Application Type	Website
Testing Type	Manual Testing
Browser	Microsoft Edge
Responsive Testing	Microsoft Edge DevTools
Operating System	Windows 11
Test Management	Jira
Test Documentation	Google Docs
Version Control	Github

6. Test Data

Following test data will be used for testing:-

- Valid user credentials.
- Invalid user credentials.
- Empty user information.
- Empty products.
- Cart data.
- Product data.
- Wishlist data.

7. Entry Criteria

The testing will begin when:-

- Application is accessible.
- Test data is ready.
- Test plan and Test cases are ready.
- Each module/feature is ready to test.

8. Exit Criteria

Testing will be considered completed when:-

- All planned test cases are executed.

- Main features are tested.
- Identified defects are documented.
- Test results have been recorded.
- A final test summary is prepared.

9. Deliverables

The following deliverables will be produced:-

- Test plan
- Test cases
- Test execution reports
- Bug reports
- Test summary reports
- Screenshots

10. Defect Management

The identified defect will be recorded in JIRA.

Each defect will contain:-

- Bug ID
- Summary
- Description
- Steps to reproduce
- Test data
- Actual Outcome
- Expected Outcome
- Severity
- Priority
- Environment
- Screenshots

Defect workflow:-

New - Assigned - Open - Fixed - Retest - Verified - Closed

11. Risks and Assumptions

11.1 Risks

The following risks may affect testing process:-

- If SauceDemo is not available, then testing cannot be performed.
- Some features may be different according to the browser.
- Changes during testing may require existing test cases to be refined.

11.2 Assumptions

The following assumptions are made for testing this project:-

- The application will be accessible during the testing period.
- The application will be tested using Microsoft Edge .

- The required features will be available for testing the application.
- The provided test credentials will be usable during testing.
- Test results will be recorded according to application actual behavior.

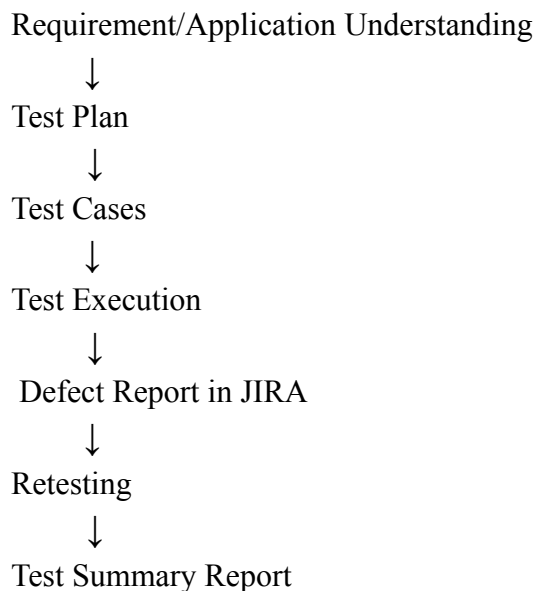

12. Test Case Summary

Approximately 60 test cases will be executed during testing.

Module	Planned Number of Test Cases
Registration	6
Login	10
Product	12
Sorting	6
Cart	7
Wishlist	4
Checkout	7
Order Completion	3
Responsive/UI	5

13. Testing Workflow

The overall test process will be followed:-

Prepared By:- Medha Kuinkel

Project:- SauceDemo

Testing Type:- Manual Testing
